

Sohoware Integrated Wireless MDU/MTU Solutions are Enhanced by Xtera's WAN Performance Appliances

Sohoware Delivers superior value to channel partners through "Modular Customization" of its solution and On-Demand Direct-to-VAR Support

Sunnyvale, CA. February 6, 2009 – Sohoware, Inc., a Wireless LAN technology pioneer and recognized as a key vendor of Business Wireless Networking by prestigious WLAN market research firms such as In-stat, announces that its Integrated Wireless MDU/MTU Solutions launched in January 2006 have been enhanced with Xtera's industry leading AscenFlow line of WAN Traffic Management Appliances.

Sohoware's Wireless MDU/MTU solutions consist of four interoperable subsystems; WAN Load Balancing and Traffic Management, Wireless Access, Wireless Subscriber Management and Internet Security. Each subsystem encompasses models optimized for different scale of deployment.

Sohoware has been a long-term strategic co-marketing partner for the industry leading WAN Load Balancer products, AscenLink (a.k.a. Sohoware BroadLink), developed by AscenVision, now a division of Texas-based Xtera, Inc. AscenFlow is a new series of WAN Traffic Management Appliances featuring advanced Layer-7 Traffic Shaping and QoS Management. As Wireless MDU/MTU solutions require multiple DSL/Cable/T1 connections to serve the aggregate Internet bandwidth demand, AscenLink and AscenFlow provide seamlessly integrated WAN Performance solutions for Wireless MDU/MTU.

Sohoware's EAP100 Industrial Grade WLAN AP is another similarly unique solution well positioned for large wireless MTU applications due to its superior RF performance and environmentally hardened packaging design. For outdoor Wireless applications, the AeroExtend point-to-multipoint Wireless Bridge/AP and AeroMesh WiFi Mesh AP solutions can be tailored to match customers' price/performance/feature considerations. The AeroGate Wireless Subscriber Management solution consists of WLH3000 for wireless hotspot and WHG301/501/701 for large hotel and MDU/MTU. The BroadScan Security family consists of model SCL1200, SCL2000 and SCL3000, all featuring All-in-One Firewall/VPN/IPS/Anti-Virus/Anti-Spam.

About Sohware

Sohware provides business wireless networking solutions that conform to OACIS open architecture through a Partner-Centric channel model for SMB, hospitality, MTU/MDU property, and campus networks. Sohware solutions offer innovative, business-class features combining the performance, ease of use, and affordability demanded by the growing SMB and Small to Medium Service Provider (SMSP) markets. OACIS portfolio solutions include:

- AeroMesh indoor / outdoor Wireless Mesh with VoWiFi support
- AeroGuard Industrial Grade Wireless Access Points
- AeroExtend Outdoor Wireless Bridge/AP
- AeroGate Subscriber Management Appliances
- BroadScan UTM Internet Security Appliances
- BroadLink WAN Performance Appliances
