## Industrial-Grade Outdoor Wireless

### AeroExtend™ by Sohaware

Building a wireless LAN network outdoors requires access points and bridges designed specifically for the job. Sohaware's AeroExtend family is rated to withstand weather and temperature conditions, and combines the high performance features in demand by IT networking VARs.

- [802.11abg support](#)
- [WPA/WPA2/802.1x security](#)
- [IP65 enclosures](#)
- [Integrated PoE](#)

Reliable, cost effective, and built to last, AeroExtend makes outdoor wireless networking easy. Available in single and dual radio models to support AP, point to point, and point to multipoint configuration.

Available only to registered VARs. Contact us for VAR exclusive pricing today.
