Open Source Spam-Virus Firewalls

BroadScan™ by Sohoware

No more update subscriptions and add-on fees to activate features. BroadScan™ appliances offer business-class Spam, virus and Spyware filtering with automatic real-time updates based on industry leading open source engines.

- [ClamAV anti-virus](#)
- [SpamAssassin](#)
- [SNORT](#)

Plus, BroadScan™ integrates Firewall, IDS/IPS, content filtering, policy control, VPN, RADIUS, load balancing and much more. For small and medium business, an integrated security appliance is recognized as the most cost efficient way to implement and manage a total security strategy. BroadScan™ makes it happen in a subscription-free approach.

Available only to registered VARs. Contact us for VAR exclusive pricing today.
