

Application Note: Example Hotspot Networks

Scenarios for defining the role of the Hotspot Gateway in a Small or Medium business network

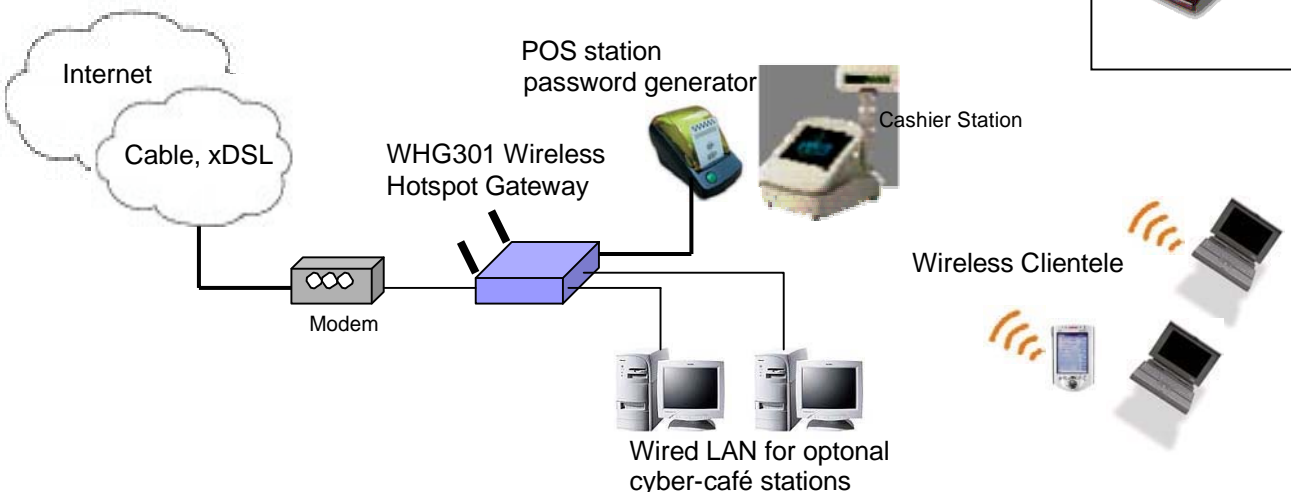

Hotspot Scenario – WHG101 Network for Under 50 Users

This represents a café or restaurant location where Internet service is managed between an ISP and the clientele via a RADIUS server.

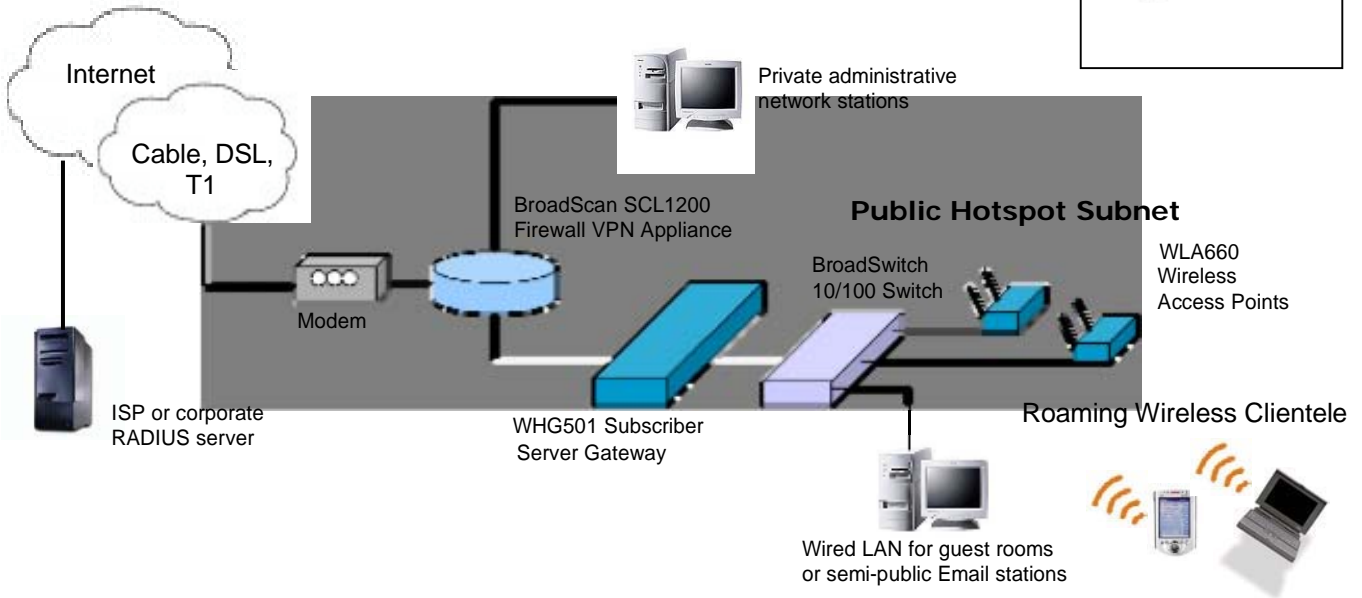

Hotspot Scenario – WHG301 Network for Under 120 Users

For a café or restaurant location that wants to manage the Internet service relationship directly with the clientele with no ISP involvement.

Hotspot Scenario – WHG501 Network for up to 500 Users

A foundation network for hotel or public venue deployments supporting over 1000 clients, requiring separated public and private subnets.

Hotspot Scenario – WHG701 Network for up to 1500 Users

For Enterprise hotel networks that utilize corporate RADIUS and PMS billing management systems, with separated public and private subnets.
